

PRESS RELEASE:

December 12, 2008

New Transitions is pleased to announce that thanks to the **generosity** of the **Variety Club: The Children's Charity**, we will soon be able to offer a unique "After School Kids Club".

The Variety has been a very generous donator many times for us at MAPCL and they have come through once again! They have assisted us in donating the start up fees for what we know will be an important and much needed program for children

This program will focus on teaching children social skills in a play environment. Staff will be able to role model and work through social skill situations in an immediate, hands-on way. This program will benefit the families of these children in many different ways. It will provide after school care for those working families that need some thing to fill the gap between after school is out and when they finish work. They will also see the benefits that it will have on their children. The children will learn how to share, take turns, learn to have conversations with peers and so much more. These social skills will be beneficial through out their lives and the areas that these skills will spill over to will be limitless.

We look forward to beginning this program in the New Year!

Look for more details in the near future!

Thank You Variety Club!

You truly are about the Children.
